

Fairfax County Park Authority Volunteer Training Personal Protective Equipment

Personal Protective Equipment (PPE)

- Equipment
- Non-permitted activities
- Justification

Personal Protective Equipment (PPE)

Equipment: Certain jobs or tasks can only be accomplished by wearing safety vests, gloves, work boots, etc. If the job you are doing requires some kind of protective safety equipment, FCPA will provide it for you. Please wear it!

- Check all equipment before wearing and do not use if any part is damaged. Replace worn out gear immediately.
- Do not begin a task if the required protective equipment is not available.

Personal Protective Equipment (PPE)

Non-permitted activities: Only trained and medically-cleared personnel can perform activities requiring the use of respirators. These individuals generally work in aquatic pump rooms with pool chemicals or golf course fertilizer applications.

This is an OSHA requirement. A dust or nuisance style mask is not included in this discussion.

Personal Protective Equipment (PPE)

Justification: Personal protective equipment is equipment worn to minimize exposure to hazards which could cause serious workplace injuries and illnesses.

Please do wear all recommended protective safety equipment.

If you need to wear gloves, safety glasses, boots, hard hats, coveralls or a vest, please remember it is important to use these items.
